CVCTX SmartHome™

Solutions for Connected Households

CommandIQ: Take Control of Your Home Wi-Fi

CommandIQ is a mobile app that puts you in full control of your home Wi Fi network. From your smartphone or tablet, you can easily manage connected devices, boost performance, strengthen security, set parental controls, and resolve common network issues—all in one convenient place.

What You Can Do with **CommandIQ**?

Manage Your Wi-Fi Network

- View all connected devices
- Rename devices for quick and easy recognition
- See who and what is using your network
- Set-up guest Wi-Fi networks
- Update Wi-Fi names (SSID) and passwords
- Add new devices using simple in-app tools

Improve Network Performance

- Run speed and bandwidth tests
- Prioritize internet traffic for:
  - Gaming
  - Streaming
  - Video conferencing
  - Work-from-home applications
- Monitor network performance in real time

Family & Parental Controls

- Create profiles for family members
- Assign devices to each user
- Set screen-time schedules
- Pause internet access by device or person
- Filter content and manage online activity

Protect Your Home Network

- Monitor for potential security threats
- Receive alerts for suspicious activity
- Automatically block known risks
- Access security insights through CVCTX SmartHome services

Why Use CommandIQ?

- Greater control over home Wi-Fi
- Enhanced safety and security online
- Better visibility into connected devices
- Reduced need for tech support and troubleshooting
- Easy self-service from anywhere in the home

***CommandIQ** gives you the tools to optimize performance, protect your network, and manage every device with confidence—all from one easy to use app.*

How to Get Started:

STEP 1: Download the App

Search for '**CommandIQ**' on:

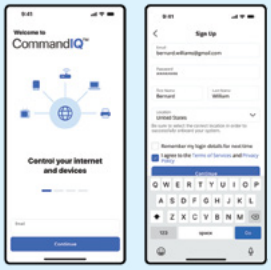
Download on the App Store

GET IT ON Google Play

Install on your mobile device.

STEP 2: Create Your Account

- Open the app and follow the on-screen steps to connect to your supported router.
- Each account allows up to two emails.
- Once your account is created, you can configure your system and access Wi-Fi controls and protection.



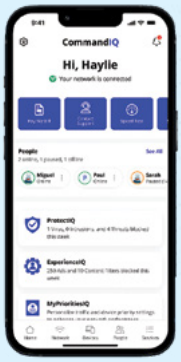
STEP 3: Connect Your Gateway

Follow the on-screen instructions for new system set-up and to pair/link your router (ie. select option to install your system, scan QR code on your system or enter system details manually).

STEP 4: Explore Your Dashboard

The home screen provides quick access to:

- Connected devices
- Wi-Fi settings
- Network performance
- Security alerts
- Family controls
- Support resources



Download **CommandIQ** today and start managing your home network smarter, safer, and faster—conveniently from your smartphone or tablet.
